Level up your expertise no matter your background

Broad Spectrum of Projects

Our clientele come from a wide variety of industries and needs, creating ample opportunities for you to keep evolving as a professional.

Self Development

Constant self improvement may not always be smooth sailing. This is where we come in - offering support every step of the way on your journey of professional development.

Join the big leagues

Foray into the world of the big market movers. With us you will have the opportunity to work with industry pioneers and the preeminent market leaders.

Whether you're an experienced professional or a recent graduate, working with Conceptdigital could be the challenging yet rewarding next step that your career needs.

The sheer diversity of both projects and industries that Conceptdigital is involved in is vast:

- German digital vet clinic
- E-wallet for a large British commercial bank
- AI powered inventory and overstock management system for an Austrian manufacturer
- Conversational AI chatbot for a British real estate developer
- E-commerce platform with data science solutions for one of the largest companies in the energy sector in UAE,
- The largest supplier of medical cannabis products in Germany
- MVP podcast analytics platform for a large American media company, just to name a few.

Our aspiration is to offer our employees the opportunity to uncover their peak professional potential. Rewarding ambition, ingenuity and collaboration is what we as a company stand for.

This breadth of projects coupled with our robust employee support system coalesces into an environment that gives birth to true tech enthusiasts who possess insight into how leading corporations thrive and maintain leadership within some of the most competitive tech industries around the world. At Conceptdigital, there is almost certainly a project that will match your interests, where you can earn promotion in our meritocracy first and foremost incentive employee structure.

We Have Our Own Proprietary IT academy

www.digitalinstitute.ge is our IT Academy, which stands out with its hands-on approach to teaching software development and its top-tier lecturers from leading companies such as Microsoft, Tesla, Google, Y Combinator-backed fintech startup Payze, DataArt and more.
